Report on Review of Interim Financial Statements

(English Translation of a Report Originally Issued in Korean)

To the Shareholders and Board of Directors of KT Corporation

Reviewed Financial Statements

We have reviewed the accompanying separate interim financial statements of KT Corporation (the "Company"). These financial statements consist of the separate interim statement of financial position of the Company as of March 31, 2017, and the separate interim statements of profit or loss, separate interim statements of comprehensive income, separate interim statements of changes in equity and separate interim statements of cash flows for the three-month periods ended March 31, 2017 and 2016, and a summary of significant accounting policies and other explanatory notes, expressed in Korean won.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these separate interim financial statements in accordance with International Financial Reporting Standards as adopted by the Republic of Korea ("Korean IFRS") 1034 *Interim Financial Reporting*, and for such internal control as management determines is necessary to enable the preparation of separate interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to issue a report on these separate interim financial statements based on our reviews.

We conducted our reviews in accordance with quarterly and semi-annual review standards established by the Securities and Futures Commission of the Republic of Korea. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Korean Standard on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe the accompanying separate interim financial statements are not presented fairly, in all material respects, in accordance with the Korean IFRS 1034 *Interim Financial Reporting*.

Other Matters

We have audited the separate statement of financial position of the Company as of December 31, 2016, and the related separate statements of profit or loss, comprehensive income, changes in equity and cash flows for the year then ended, in accordance with Korean Standards on Auditing. We expressed an unqualified opinion on those separate financial statements in our audit report dated March 3, 2017. These separate financial statements are not included in this review report. The separate statement of financial position as of December 31, 2016 presented herein for comparative purposes, is consistent, in all material respects, with the above audited separate statement of financial position as of December 31, 2016.

Review standards and their application in practice vary among countries. The procedures and practices used in the Republic of Korea to review such financial statements may differ from those generally accepted and applied in other countries.

This report is effective as of May 15, 2017, the review report date. Certain subsequent events or circumstances, which may occur between the review report date and the time of reading this report, could have a material impact on the accompanying separate interim financial statements and notes thereto. Accordingly, the readers of the review report should understand that there is a possibility that the above review report may have to be revised to reflect the impact of such subsequent events or circumstances, if any.

Notes to the Separate Interim Financial Statements March 31, 2017 and 2016 (Unaudited), and December 31, 2016

1. General Information

KT Corporation (the "Company") commenced operations on January 1, 1982, when it was spun off from the Korea Communications Commission (formerly, the Korean Ministry of Information and Communications) to provide telephone services and to engage in the development of advanced communications services under the Act of Telecommunications of Korea. The address of the Company's registered office is 90, Buljeong-ro, Bundang-gu, Seongnam City, Gyeonggi Province, Korea.

On October 1, 1997, upon the announcement of the Act on the Management of Government-Invested Institutions and the Privatization Law, the Company became a government-funded institution under the Commercial Code of Korea.

On December 23, 1998, the Company's shares were listed on the Korea Exchange.

On May 29, 1999, the Company issued 24,282,195 additional shares and issued American Depository Shares (ADS), representing new shares and government-owned shares, at the New York Stock Exchange. On July 2, 2001, the additional ADS representing 55,502,161 government-shares were issued at the New York Stock Exchange.

In 2002, the Company acquired the entire government-owned shares in accordance with the Korean Government's privatization plan. As of March 31, 2017, the Korean Government does not own any share in the Company.

2. Significant Accounting Policies

2.1 Basis of Preparation

The Company maintains its accounting records in Korean won and prepares statutory financial statements in the Korean language (Hangul) in accordance with the International Financial Reporting Standards as issued by the Republic of Korea (Korean IFRS). The accompanying separate interim financial statements have been condensed, restructured and translated into English from the Korean language financial statements.

Certain information attached to the Korean language financial statements, but not required for a fair presentation of the Company's financial position, financial performance or cash flows, is not presented in the accompanying separate interim financial statements.

The separate interim financial statements of the Company as of and for the three-month period ended March 31, 2017, have been prepared in accordance with Korean IFRS 1034 *Interim Financial Reporting*. These separate interim financial statements have been prepared in accordance with Korean IFRS which is effective or has been early adopted as of March 31, 2017.

Notes to the Separate Interim Financial Statements March 31, 2017 and 2016 (Unaudited), and December 31, 2016

(1) New standards and amendments adopted by the Company

The Company newly applied the following amended and enacted standards and interpretations for the annual period beginning on January 1, 2017, and the application does not have a material impact on the separate interim financial statements.

- Amendment to Korean IFRS 1007 Statement of Cash Flows

Amendments to Korean IFRS 1007 *Statement of Cash Flows* require to provide disclosures that enable users to financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash flows.

- Amendment to Korean IFRS 1012 Income Tax

Amendments to Korean IFRS 1012 clarify how to account for deferred tax assets related to debt instruments measured at fair value. Korean IFRS 1012 provides requirements on the recognition and measurement of current or deferred tax liabilities or assets. The amendments issued clarify the requirements on recognition of deferred tax assets for unrealized losses, to address diversity in practice.

- Amendment to Korean IFRS 1112 Disclosures of Interests in Other Entities

Amendments to Korean IFRS 1112 clarify when an entity's interest in a subsidiary, a joint venture or an associate is classified as held for sales in accordance with Korean IFRS 1105, the entity is required to disclose other information except for summarized financial information in accordance with Korean IFRS 1112.

(2) New standards and interpretations not yet adopted by the Company

New standards and interpretations issued, but not effective for the financial year beginning January 1, 2017, and not early adopted are enumerated below:

- Amendments to Korean IFRS 1102 Share-based Payment

Amendments to Korean IFRS 1102 clarify accounting for a modification to the terms and conditions of a share-based payment that changes the classification of the transaction from cash-settled to equity-settled. The amendment also clarifies that the measurement approach should treat the terms and conditions of a cash-settled award in the same way as for an equity-settled award. The Company will apply the amendments for annual periods beginning on or after January 1, 2018, and early adoption is permitted. The Company does not expect the amendments to have a significant impact on the separate financial statements.

Notes to the Separate Interim Financial Statements March 31, 2017 and 2016 (Unaudited), and December 31, 2016

- Enactments to Interpretation 2122 Foreign Currency Transaction and Advance Consideration

According to these enactments, the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income (or part of it) is the date on which an entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration. If there are multiple payments or receipts in advance, the entity shall determine a date of the transaction for each payment or receipt of advance consideration. These enactments will be effective for annual periods beginning on or after January 1, 2018, with early adoption permitted. The Company does not expect the enactments to have a significant impact on the separate interim financial statements.

- Korean IFRS 1109 Financial Instruments

The new standard for financial instruments issued on September 25, 2015 are effective for annual periods beginning on or after January 1, 2018 with early application permitted. This standard will replace Korean IFRS 1039 *Financial Instruments: Recognition and Measurement.* The Company will apply the standards for annual periods beginning on or after January 1, 2018.

The standard requires retrospective application with some exceptions. For example, an entity is not required to restate prior period in relation to classification and measurement (including impairment) of financial instruments. The standard requires prospective application of its hedge accounting requirements for all hedging relationships except the accounting for time value of options and other exceptions.

Korean IFRS 1109 Financial Instruments requires all financial assets to be classified and measured on the basis of the entity's business model for managing financial assets and the contractual cash flow characteristics of the financial assets. A new impairment model, an expected credit loss model, is introduced and any subsequent changes in expected credit losses will be recognized in profit or loss. Also, hedge accounting rules amended to extend the hedging relationship, which consists only of eligible hedging instruments and hedged items, qualifies for hedge accounting.

An effective implementation of Korean IFRS 1109 requires preparation processes including financial impact assessment, accounting policy establishment, accounting system development and the system stabilization. The impact on the Company's financial statements due to the application of the standard is dependent on judgements made in applying the standard, financial instruments held by the Company and macroeconomic variables. The following areas are likely to be affected in general with the implementation of Korean IFRS 1109. The Company is in preparation for analyzing the effects to the separate financial statement.

Notes to the Separate Interim Financial Statements March 31, 2017 and 2016 (Unaudited), and December 31, 2016

(a) Classification and Measurement of Financial Assets

When implementing Korean IFRS 1109, the classification of financial assets will be driven by the Company's business model for managing the financial assets and contractual terms of cash flow. The following table shows the classification of financial assets measured subsequently at amortized cost, at fair value through other comprehensive income and at fair value through profit or loss. If a hybrid contract contains a host that is a financial asset, the classification of the hybrid contract shall be determined for the entire contract without separating the embedded derivative.

| Business model for the contractual cash flows characteristics | Solely represent payments of principal and interest | All other |
|---|--|--|
| Hold the financial asset for the collection of the contractual cash flows | Measured at amortized cost ¹ | Pagagnized at fair value through |
| Hold the financial asset for the collection of the contractual cash flows and trading | Recognized at fair value through other comprehensive income ¹ | Recognized at fair value through profit or loss ² |
| Hold for trading | Recognized at fair value through profit or loss | |

¹ A designation at fair value through profit or loss is allowed only if such designation mitigates an accounting mismatch (irrevocable).

With the implementation of Korean IFRS 1109, the criteria to classify the financial assets at amortized cost or at fair value through other comprehensive income are more strictly applied than the criteria applied with Korean IFRS 1039. Accordingly, the financial assets at fair value through profit or loss may increase by implementing Korean IFRS 1109 and may result an extended fluctuation in profit or loss.

As of March 31, 2017, the Company owns loans and receivables of $\mbox{$\mbox{$$\psi}$}$ 4,216,131 million, financial assets available-for-sales of $\mbox{$\mbox{$$$$}$}$ 104,336 million.

According to Korean IFRS 1109, equity instruments that are not held for trading, the Company can make an irrevocable election at initial recognition to classify the instruments as assets measured at fair value through other comprehensive income, which all subsequent changes in fair value being recognized in other comprehensive income and not recycled to profit or loss. As at March 31, 2017, the Company holds equity instruments of $\forall 97,136$ million classified as financial assets available-for-sale.

According to Korean IFRS 1109, debt instruments those contractual cash flows do not represent solely payments of principal and interest and held for trading, and equity instruments that are not designated as instruments measured at fair value through other comprehensive income are measured at fair value through profit or loss.

² Equity investments not held for trading can be recorded in other comprehensive income (irrevocable).

Notes to the Separate Interim Financial Statements March 31, 2017 and 2016 (Unaudited), and December 31, 2016

(b) Impairment: Financial Assets and Contract Assets

Korean IFRS 1109 sets out a new forward looking 'expected loss' impairment model which replaces the incurred loss model under Korean IFRS 1039 and applies to:

- Financial assets measured at amortized cost
- Debt investments measured at fair value through other comprehensive income, and
- Certain loan commitments and financial guaranteed contracts.

And the Company could recognize credit losses early in accordance with Korean IFRS 1039. The Company holds debt instrument of \forall 4,216,131 million (Loans and receivables of \forall 4,216,131 million). For this assets, the Company provides loss allowance of \forall 523,144 million.

(c) Hedge Accounting

Hedge accounting mechanics (fair value hedges, cash flow hedges and hedge of net investments in a foreign operations) required by Korean IFRS 1039 remains unchanged in Korean IFRS 1109, however, the new hedge accounting rules will align the accounting for hedging instruments more closely with the Company's risk management practices. As a general rule, more hedge relationships might be eligible for hedge accounting, as the standard introduces a more principles-based approach. Korean IFRS 1109 allows more hedging instruments and hedged items to qualify for hedge accounting, and relaxes the hedge accounting requirement by removing two hedge effectiveness tests that are a prospective test to ensure that the hedging relationship is expected to be highly effective and a quantitative retrospective test (within range of 80-120 %) to ensure that the hedging relationship has been highly effective throughout the reporting period. As of March 31, 2017, the Company applies the hedge accounting to its assets, liabilities that amount to \forall 74,654 million, \forall 46,757 million respectively.

- Korean IFRS 1115 Revenue from Contracts with Customers

The Company will apply Korean IFRS 1115 Revenue from Contracts with Customers issued on November 6, 2015 for annual reporting periods beginning on or after January 1, 2018. Earlier adoption is permitted under Korean IFRS. This standard replaces Korean IFRS 1018 Revenue, Korean IFRS 1011 Construction Contracts, Interpretation 2031 Revenue-Barter Transactions Involving Advertising Services, Interpretation 2113 Customer Loyalty Programs, Interpretation 2115 Agreements for the Construction of Real Estate and Interpretation 2118 Transfers of assets from customers. The Company must apply Korean IFRS 1115 Revenue from Contracts with Customers within annual reporting periods beginning on or after January 1, 2018, and will apply the standard retrospectively to prior reporting period presented in accordance with Korean IFRS 1008 Accounting Policies, Changes in Accounting Estimates and Errors and apply simplified transition method with no restatement for completed contracts and other as of January 1, 2017.

Notes to the Separate Interim Financial Statements March 31, 2017 and 2016 (Unaudited), and December 31, 2016

The new standard is based on the principle that revenue is recognized when control of a good or service transfers to a customer so the notion of control replaces the existing notion of risks and rewards. A new five-step process must be applied before revenue from contract with customer can be recognized:

- · Identify contracts with customers
- · Identify the separate performance obligation
- Determine the transaction price of the contract
- · Allocate the transaction price to each of the separate performance obligations, and
- · Recognize the revenue as each performance obligation is satisfied.

The Company had organized a separate Task Force team since December 31, 2014 for preparation of implementing Korean IFRS 1115 *Revenue from Contracts with Customers*. Also the Company develops the internal control system and constructs accounting process system by analyzing the Company's revenue structure with accounting firm and computation expert. Korean IFRS 1115 will affect not only accounting method but also the general business practice including strategy for sales and business attitude. Therefore, the Company opens an orientation program for both Company's directors and employees, and periodically reports to the managements about plan for implementation and progress.

As of the March 31, 2017 the Company is analyzing the effects on the separate financial statements with the implementation of Korean IFRS 1115. The Company plans to perform detailed analysis on financial effects of applying the standard until March 31, 2018 and will disclose the result of the analysis in the notes on the separate financial statements as of March 31, 2018. The Company identified the following areas are likely to be affected in general.

(a) Identifying performance obligations

The Company provides telecommunication services and sells handsets as their main business. With the implementation of Korean IFRS 1115, the Company identifies performance obligations with a customer such as providing telecommunication services, selling handsets and other. The timing of revenue recognition depends on a performance obligation is satisfied at a point in time or over time. Where a performance obligation is satisfied over time, the related revenue is also recognized over time.

(b) Allocation the transaction price

With the implementation of Korean IFRS 1115, the Company allocates the transaction price to each performance obligation identified in the contract based on a relative stand-alone selling prices of the goods or services being provided to the customer. To allocate the transaction price to each performance obligation on a relative stand-alone price basis, the Company determines the stand-alone selling price at contract inception of the distinct good or service underlying each performance obligation in the contract and allocate the transaction price in

Notes to the Separate Interim Financial Statements March 31, 2017 and 2016 (Unaudited), and December 31, 2016

proportion to those stand-alone selling price. The stand-alone selling price is the price at which the Company would sell a promised good or service separately to the customer. The best evidence of a stand-alone selling price is the observable price of a good or service when the Company sells that good or service separately in similar circumstances and to similar customers.

(c) Incremental costs of obtaining a contract

The Company pays the commission fees when new customer subscribe for telecommunication services. The incremental costs of obtaining a contract are those commission fess that the Company incurs to obtain a contract with a customer that it would not have incurred if the contract had not been obtained.

According to Korean IFRS 1115, the Company recognizes as an asset the incremental cost of obtaining contract and amortize it through the contract period. However, as a practical expedient, the Company may recognize the incremental costs of obtaining a contracts as an expense when incurred if the amortization period of the asset is one year or less.

2.2 Accounting Policies

Significant accounting policies and method of computation used in the presentation of the condensed separate interim financial statements are consistent with those of the previous financial year, except for the changes due to the application of amendment and enactments of standards described in Note 2.1.(1).

3. Critical Accounting Estimates and Assumptions

The Company makes estimates and assumptions concerning the future. The estimates and assumptions are continuously evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the current circumstances. Actual results may differ from these estimates.

Significant accounting estimates and assumptions applied in the preparation of these condensed separate interim financial statements are the same as those that applied to the separate financial statements for the year ended December 31, 2016.

23. Earnings per Share

Basic earnings per share is calculated by dividing the profit for the period by the weighted average number of ordinary shares outstanding during the period, excluding ordinary shares purchased by the Company and held as treasury stock.

Basic earnings per share for the three-month periods ended March 31, 2017 and 2016, is calculated as follows:

| | 2017 | 2016 |
|--|-------------|-------------|
| Profit attributable to ordinary shares (in millions of Korean won) | ₩ 284,585 | ₩ 278,618 |
| Weighted average number of ordinary shares outstanding | 244,971,643 | 244,845,177 |
| Basic earnings per share (in Korean won) | 1,162 | 1,138 |

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. The Company has dilutive potential ordinary shares from other share-based payments.

Notes to the Separate Interim Financial Statements March 31, 2017 and 2016 (Unaudited), and December 31, 2016

Diluted earnings per share for the three-month periods ended March 31, 2017 and 2016, is calculated as follows:

| | 2017 | 2016 |
|---------------------------------|-------------|-------------|
| Profit attributable to | | |
| ordinary shares | ₩ 284,585 | ₩ 278,618 |
| (in millions of Korean won) | | |
| Adjusted net income | | |
| attributable to ordinary shares | 284,585 | 278,618 |
| (in millions of Korean won) | | |
| Number of dilutive potential | _ | _ |
| ordinary shares outstanding | _ | |
| Weighted-average number of | | |
| ordinary shares outstanding | 244,971,643 | 244,845,177 |
| and dilutive ordinary shares | | |
| Diluted earnings per share | 1,162 | 1,138 |
| (in Korean won) | 1,102 | 1,130 |

Diluted earnings per share is calculated by dividing adjusted profit for the period by the sum of the number of ordinary shares and dilutive potential ordinary shares. Certain other share-based payments have no dilutive effect and are excluded from the calculation of diluted earnings per share.

24. Cash Generated from Operations

The range of estimated cash flows is significant and the probabilities of the various estimates cannot be reasonably assessed and therefore these instruments are measured at cost.

The Company does not have any plans to dispose of the above-mentioned equities instruments in the near future. These instruments will be measured at fair value when the Company can develop a reliable estimate of the fair value.

¹The Company did not conduct fair value estimation since the carrying amount is a reasonable approximation of the fair value.

² Equity instruments that do not have a quoted market price in an active market are measured at cost because their fair value cannot be measured reliably and excluded from the fair value disclosures.

(3) Fair Value Hierarchy

Assets measured at fair value or for which the fair value is disclosed are categorized within the fair value hierarchy, and the defined levels are as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

Fair value hierarchy classifications of the financial assets and financial liabilities that are measured at fair value or its fair value is disclosed as of March 31, 2017 and December 31, 2016, are as follows:

(5) Valuation Processes for Fair Value Measurements Categorized within Level 3

The Company uses external experts that perform the fair value measurements required for financial reporting purposes. External experts report directly to the chief financial officer (CFO), and discusses valuation processes and results with the CFO in line with the Company's reporting dates.

(6) Gain and Loss on Valuation at the Transaction Date

In the case that the Company values derivative financial instruments using inputs not based on observable market data, and the fair value calculated by the said valuation technique differs from the transaction price, then the fair value of the financial instruments is recognized as the transaction price. The difference between the fair value at initial recognition and the transaction price is deferred and amortized using a straight-line method by maturity of the financial instrument. However, in the case where inputs of the valuation techniques become observable in markets, the remaining deferred difference is immediately recognized in full in profit for the year.
